

inxire Digital Maintenance: the platform for digital maintenance management

Automated. Intelligent. Predictive.

Areas of application

- Creation, maintenance and automatic compilation of rules and standards
- Optimization of maintenance processes

Your benefits

- Digital support for any servicing task
- Higher productivity, lower maintenance costs

Maximum digital performance in your maintenance process

With inxire Digital Maintenance, you can set new standards for your maintenance management. The highly specialized software completely adapts to the needs of your organization, from the creation of rules and standards to predictive maintenance.

inxire Digital Maintenance minimizes your maintenance costs and repair times, increases the service life of your machines, vehicles and systems and ensures the highest operational reliability. Automated dynamic workflows speed up your process sequences and increase company performance in a targeted manner.

inxire Digital Maintenance allows you to meet all of the requirements for maintenance and servicing and make optimal use of your full economic potential.

Current projects

REFI

Digital creation and administration of rules and standards for the maintenance of vehicles at DB Fernverkehr and DB Regio.

DMCube

Provision, management and processing of all rules and standards in a modular digital data model and compilation and checking of order documents for the sites.

Customer testimonials

“The topic of digitalization is very important to Deutsche Bahn. The inxire Digital Maintenance platform is an important component in this, which not only pushes us forward economically, but also with regard to the satisfaction of our clients.”

Margit Olbrich,
IT Use, Diagnosis, and Predictive
Maintenance,
DB Systemtechnik GmbH

“For us authors, inxire Digital Maintenance means an enormous reduction in workload. We can create the documents significantly faster and more easily than before, and the release processes have also become a lot shorter. All of the necessary data is compiled from different sources in inxire. So we can be sure that everything is always up-to-date.”

DB Regio AG, DB Fernverkehr AG
